Forecast for Sunday 01 Sep 2024

Weather: Cloud will thicken and lower overnight, bringing patchy outbreaks of rain, especially across eastern areas. Becoming brighter through the morning, with sunny spells developing during the afternoon as the fresh easterly winds begin to ease to give a warmer feel. There is the risk of an isolated shower throughout however, and these could turn heavy into the afternoon and evening. Low confidence in the extent of showers through Sunday and important to keep up to date with the latest forecast.

Chance of cloud-free hill tops above 800m: 10% in the morning becoming 70% by the end of the afternoon.

Low Cloud and visibility: Widespread cloud obscuring hills above 400-500m during the morning, with patchy cloud perhaps down to 200-300m on eastern slopes at times. By the mid-afternoon cloud bases begin to increasingly break up and lift to 700-800m with some brighter spells at times. Visibilities locally poor or very poor at height during the morning but improving to become generally good by the afternoon.

Meteorologist's View

A better afternoon likely after early cloud lifts and breaks with some higher UV levels possible given sunny spells. An uncertain risk of showers however, make sure to stay up to date with the latest forecast and be prepared for changeable weather.

Forecast for Monday 02 Sep 2024

Weather: Cloudy with outbreaks of rain during the day, these potentially heavy at times with a risk of thunder. Freshening north-westerly winds.

Maximum wind: North-westerly 20-25mph gusting 30-35mph into the later afternoon.

Chance of cloud-free hill tops above 800m: 20%.

Low Cloud and visibility: Widespread cloud down to 300-400m at times, this combining with outbreaks of rain to give some poor or very poor visibility at height. Visibility better at lower levels but temporary decreases likely in combination with any heavy rain.

Temperature: **Valleys:** Plus 16 Celsius.
At 800m: Plus 12 Celsius becoming Plus 8 Celsius.
Freezing level: Above summits.
